Alim Khalelov | AI-Native Product Manager

alim.khalelov@gmail.com · +7 705 350 80 33 · Telegram: @AlimLLC · linkedin.com/in/alimzhan-khalelov

Summary

Product Manager with 5+ years shipping 0-to-1 products at AI and Web3 startups. I build multi-agent systems, design validation pipelines for LLM outputs, and run rapid prototyping cycles to find product-market fit before scaling

Product Discovery | GTM strategy | PRD/User Stories | sprint planning | backlog prioritization | A/B testing | stakeholder alignment | Multi-agent orchestration | LLM API integration (Gemini, Claude, OpenAI) | prompt engineering | human eval pipelines | LLM-as-judge scoring | output validation | Next.js | React | TypeScript | Python | web scraping | Verce | Firebase | Claude Code | Antigravity | Jira | Linear | Notion | Figma | Miro | Mixpanel | Amplitude | Google Analytics | SQL | Git | Confluence

Experience

Independent AI Product Consultant — 01/2025 – Present | Remote

Develop and deploy autonomous agent systems, full-stack AI architectures, and rapid GTM validation prototypes for early-stage startups and B2B clients.

- [ ] **AI Property Staging Platform (Sydney):** Architected a full-stack Next.js system generating suburb-specific local SEO pages and staging strategies. Built a multi-agent verification loop to check LLM outputs against real-time market data, reducing time-to-market by 70% with output validation against source data.
- [ ] **Automated Prospecting Engine:** Programmed a resilient lead generation pipeline with name-filtering logic and DOM scraping. Built custom watchdog timers and auto-retry systems to handle scraper edge cases, processing 100+ high-value leads daily.
- [ ] **Local Agent Workspace:** Integrated a multi-agent environment that automates market research, competitor analysis, and draft preparation, reducing routine tasks by 80% and maintaining personal focus on product architecture.
- [ ] **PMF Validation Engine:** Built a dynamic landing page factory that customizes value propositions per lead using targeted LLM adapters, validating product-market fit in the psychotherapist market.

Founding Product Manager | Cryptomeria Capital Group 04/2023 – 01/2025 | Dubai, UAE (Remote)

Led 0-to-1 product discovery, GTM, and ecosystem strategy for an early-stage Web3 project in a highly volatile market.

- [ ] **Portfolio Strategy:** Prototyped and validated 7 high-uncertainty Web3 products (NFTs, Telegram mini-apps). Established strict verification metrics to identify and shut down unviable concepts early, protecting capital.
- [ ] **Telegram Mini-Apps:** Designed and launched gamified onboarding mini-apps that became the primary driver of community activation and user growth.
- [ ] **Narrative AI Pipeline:** Directed an automated AI narrative engine producing a 200-page lorebook, 60 comic episodes, and 10 video trailers, proving that narrative-driven loops lower user acquisition costs.
- [ ] **Partnerships & Integrations:** Negotiated and closed 50+ strategic deals (including Animoca Brands, The Sandbox, and Decentraland) to integrate the ecosystem across the wider market.
- [ ] **Ecosystem Risk Management:** Modeled and stress-tested token utility, monetization mechanics, and network incentives to manage regulatory and financial risks.

Junior Product Manager | Startup Studio B51 — 09/2021 – 05/2023 | Tomsk, Russia (Part-time)

- [ ] Mentored student founders on MVP design, rapid experimentation, and assumption testing before writing code.
- [ ] Connected early-stage teams with VC networks, securing multiple government grants (UMNIK, Start, Student Startup).

Education

- [ ] **MSc, Innovation and Technology Brokerage** | Tomsk Polytechnic University (2021 – 2023)
- [ ] **MSc Exchange, Innovation** | University of Trento, Italy (2022)
- [ ] **BSc, Innovation & Entrepreneurship in Digital Economy** | Tomsk Polytechnic University (2017 – 2021)
- [ ] **Exchange Program** | Karlsruhe Institute of Technology (KIT), Germany (2020 – 2021)

Achievements

- [ ] **Winner**, GameDev AI Hackathon 2025 – Led architecture for an automated branching quest generator.
- [ ] **Winner**, AI GTM Hackathon – Built an end-to-end automated GTM and outreach system.
- [ ] **Finalist**, Yandex Product Case – Developed optimized contextual ad placement models.
- [ ] **Scholar**, Erasmus+ – Academic excellence grant for European exchange programs.
