Product Manager

0→1 | Early Stage | Discovery | Web3 / AI / Gamified Ecosystems

About me: Product Builder (0→1) with 5+ years in startups and 3+ years in Web3, specializing in product discovery under extreme uncertainty. I focus on fast-cycle experimentation, rapid prototyping, and lean go-to-market - validating ideas before heavy execution. Known for aligning founders, engineers, and users without formal authority. Startups bring me in when there is no PMF, unclear users, or chaotic scope - and I turn that into a coherent, testable product system.

Product Lifecycle | Go-to-Market | AI Product Integration | Data-Driven KPIs | GenAI | UX & A/B Testing | Agile/Scrum | Roadmapping | Market Research | Web3 & Gamification | Prompt Engineering | Stakeholder Management | Budgeting

---

Work:

Independent Product Manager / AI & Web3 Consultant (Remote) Jan 2025 – Jan 2026

- Co-founded Web3 marketing agency focused on KOL-driven growth and AI-assisted market research
- Designed and built AI-powered platform generating personalized marketing strategies based on project analysis and budget
- Led product discovery and pre-launch for AI Agent meme coin and AI-wrapped SaaS concepts, validating demand and terminating low-PMF ideas early
- Built AI-enabled real estate product (Australia) with ROI and timeline calculators to optimize property sale value

Senior / Founding Product Manager - Cryptomeria Capital Group Apr 2023 – Jan 2025

- Early-stage Web3 ecosystem | AI, Gamification, Consumer Products
- Led product discovery and 0→1 development across an early-stage Web3 ecosystem, operating under extreme uncertainty and limited budgets.
- Designed and validated a gamified onboarding system to address cold-start dynamics and bootstrap early network effects.
- Defined, prototyped, and tested 7+ product concepts (NFTs, mobile games, lending, Telegram mini-apps), rapidly iterating based on qualitative signals and user behavior.
- Personally led Telegram mini-app experiments that became a major driver of community activation and engagement.
- Led creative direction of AI-generated storytelling assets (200+ page lorebook, 60+ comics, 10 trailers) to test narrative-driven engagement and ecosystem identity.
- De-risked long-term scalability through multi-chain expansion research and pilots, balancing technical feasibility with ecosystem reach.
- Ran rapid growth and content experiments, growing Twitter 0 → 10K in 30 days through structured hypothesis-driven testing.
- Established partnerships with 50+ Web3 projects, including The Sandbox, Decentraland, and Animoca Brands.
- Designed and validated early-stage economic design (monetization mechanics, token utility hypotheses, and narrative framing) to test sustainability and user incentives under pre-PMF conditions.
- Company underwent funding shutdown prior to token launch; entire product and engineering team was laid off.

Junior Product Manager at Startup Studio B51 (Part-time) Sep 21 – May 23

- Startup accelerator for university founders
- Mentored student founders through early MVP stages, improving fundraising readiness.
- Organized 10+ startup events and connected early teams with investors and mentors.
- Supported access to UMNIK, Start, and Student Startup grants.
- Fostered entrepreneurial culture and increased program participation.

Selected Projects (0→1, Experimental, Self-Initiated):

- AI Quest & Narrative Generator — GameDev AI Hackathon 2025 (Winner)
- Product & narrative design of AI-generated quests and story arcs.
- Telegram Mini-App Experiments (Web3 / Gamified Growth)
- Rapid prototyping of engagement loops and cold-start mechanics.
- Automated Trading Workflow (NFT Marketplaces)
- System design and delivery of automation reducing manual work by ~90%.
- Gamified Productivity System
- Experimental habit and motivation system using XP and quest mechanics..

Education:

- **MSc, Innovation: Technology Brokerage** - Tomsk Polytechnic University (2021–2023)
- **MSc Exchange, School of Innovation** - University of Trento, Italy (2022)
- **BSc, Innovatio**n - Tomsk Polytechnic University (2017–2021)
- **BSc, Entrepreneurship in Digital Economy** - Tomsk Polytechnic University (2017–2021)
- **Exchange Program** - Cooperative State University Baden-Württemberg, Germany (2019–2020)
- **Exchange Program** - Karlsruhe Institute of Technology (KIT), Germany (2020–2021)

Achievements:

- **Winner, GameDev AI Hackathon 2025** – led AI-driven quest & narrative generation track
- **Winner, AI News Marketing Hackathon** – developed AI-driven GTM strategy
- **Finalist, Yandex Concepts Case** – designed innovative ad format concept
- **Team Lead, B51 Startup Accelerator** – guided student startups through MVP & fundraising cycle
- **Erasmus+ Scholar** – recognized for international excellence program
- **Published Researcher** – flexible & wearable electronics
